

## **ISearch eBook Connector for OverDrive: Adding Easy Access to eBooks for Students and Teachers**

For school libraries using INFOhio’s SirsiDynix Symphony Integrated Library System, a vendor specific eResource Central (eRC) connector, known as ISearch eBook Connector\*, provides seamless access through ISearch or BookMyne to the collection of eBooks and audiobooks that a school has access to through shared or individual purchase. By keeping end users within the ISearch or BookMyne catalog, the ISearch eBook Connector eliminates the need to train end users to use third-party interfaces. While in the catalog, end users can preview resources, see real-time availability, and easily download titles to their devices. When new titles are added to the vendor collection, the titles are automatically searchable in ISearch or BookMyne.

\*NOTE: (a) INFOhio currently only offers ISearch eBook Connector pricing for OverDrive ITC Shared Collections and for local Overdrive Advantage Collections. We anticipate announcing the availability of connectors for additional vendors in the future. (b) The ISearch eBook Connector is for ISearch or BookMyne catalog interface, **not** Cat or Cat Junior interface. (c) Annual renewal is automatic unless renewal cancellation is completed and submitted to INFOhio by April 30.

<b>ISearch eBook Connector: OverDrive Collection Types</b>	<b>Year 1 + Setup Anytime /Billed Quarterly Between July 1 &amp; June 30 (No Fee Proration)</b>	<b>Year 2 Annually Each July</b>
<p><b>OverDrive Shared ITC Collection</b> One eRC Connector is required for an Overdrive Shared Collection purchased by the ITC. This eRC Connector provides automatic search and download of OverDrive Shared Collection titles to participating district/school ISearch or BookMyne catalogs.</p> <p><b>Note:</b> The ITC purchases this eRC Connector. Individual libraries do not need to purchase an eRC Connector to access the ITC’s Shared OverDrive Collection through ISearch or BookMyne as the single ITC connector provides them access.</p>	\$550	\$275
<p><b>OverDrive Advantage School/District Collection</b> Advantage Collection titles are purchased independently by local school districts/libraries. To provide patrons seamless search and download access to these titles through ISearch and BookMyne an eRC Connector is needed. Districts or building libraries purchase the eRC Connector for their local Advantage Collections.</p> <p><b>Note:</b> If a library participates in a shared ITC collection, and has a local Advantage collection, INFOhio recommends the purchase of an eRC connector for the local Advantage collection so that the patron experience in ISearch and BookMyne is the same for both the OverDrive ITC Shared <u>and</u> local Advantage Collections.</p>	\$385	\$190
